Façade & Curtain Wall Systems | Doors & Windows | Glass & Architectural Works | Manpower Supply

## Who We Are

At **Emerik Valley**, we are committed to delivering reliable manpower, staffing, facilities management, and technical solutions across the UAE with professionalism, efficiency, and integrity. Since our establishment in Dubai in 2006, we have built a strong reputation by supporting businesses with skilled workforce solutions, project support, and operational excellence.

With years of industry experience, we provide tailored services for construction, facilities management, hospitality, warehousing, aviation, manufacturing, and commercial sectors. Our expertise covers recruitment, outsourcing, payroll management, MEP support, and workforce deployment, helping businesses operate smoothly and efficiently.

At Emerik Valley, we focus on quality, fast execution, and long-term client relationships. Our dedicated team ensures every project is handled with precision, compliance, and a strong commitment to customer satisfaction. Through innovation, industry expertise, and dependable service, we continue to support some of the UAE's leading companies and projects.

We believe in creating value through trust, performance, and smart workforce solutions that help businesses grow with confidence.

## About Us

Founded in Dubai in **2006**, Emerik Valley has established itself as a trusted provider of manpower, staffing, facilities management, and technical support services across the UAE. Known for reliability, professionalism, and fast execution, we support businesses with workforce solutions tailored to the demands of modern industries and large-scale projects. Headquartered in Dubai, we work with clients across construction, MEP, facilities management, hospitality, warehousing, aviation, and commercial sectors. Our services include recruitment, workforce outsourcing, payroll management, deployment, and project support, helping companies maintain efficient and uninterrupted operations.

At Emerik Valley, our focus is on delivering dependable solutions with high standards of quality, compliance, and safety. Through experienced management, skilled manpower, and industry expertise, we ensure every project is executed efficiently while maintaining client satisfaction at every stage. With a commitment to long-term partnerships, operational excellence, and continuous growth, Emerik Valley continues to support some of the UAE's leading businesses with trusted workforce and technical solutions.

## **Core Services**

### **Façade & Curtain Wall Systems**

At Emerik Valley, we deliver complete façade and curtain wall solutions designed to enhance the appearance, durability, and performance of modern buildings across the UAE. From design support and fabrication to supply and installation, we provide advanced aluminium and glass façade systems for commercial towers, residential projects, and large-scale developments. Our team ensures precision engineering, weather resistance, structural stability, and full compliance with UAE building standards.

#### **Unitized Curtain Wall**

Our unitized curtain wall systems are factory-manufactured and assembled into ready-to-install panels, allowing faster installation and superior quality control. These systems are ideal for high-rise buildings where speed, safety, and consistency are critical. Each panel is carefully glazed, sealed, and tested before installation to reduce on-site work and ensure reliable long-term performance.

#### **Stick Curtain Wall**

The stick curtain wall system is assembled directly on-site using aluminium mullions, transoms, and glass panels. This system provides greater flexibility for customized architectural designs and mid-rise commercial projects. Our experienced installation team handles every stage with precision, from framework fixing and alignment to glass placement and silicone finishing, ensuring a clean and durable façade structure.

## Structural Glazing

Emerik Valley offers premium structural glazing solutions that create a sleek and modern frameless glass appearance. Using high-performance structural silicone, the glass is securely bonded to the aluminium framework, delivering a seamless exterior finish with excellent strength and weather protection. Our team follows strict quality and safety standards to achieve precision installation and long-lasting performance for modern architectural projects.

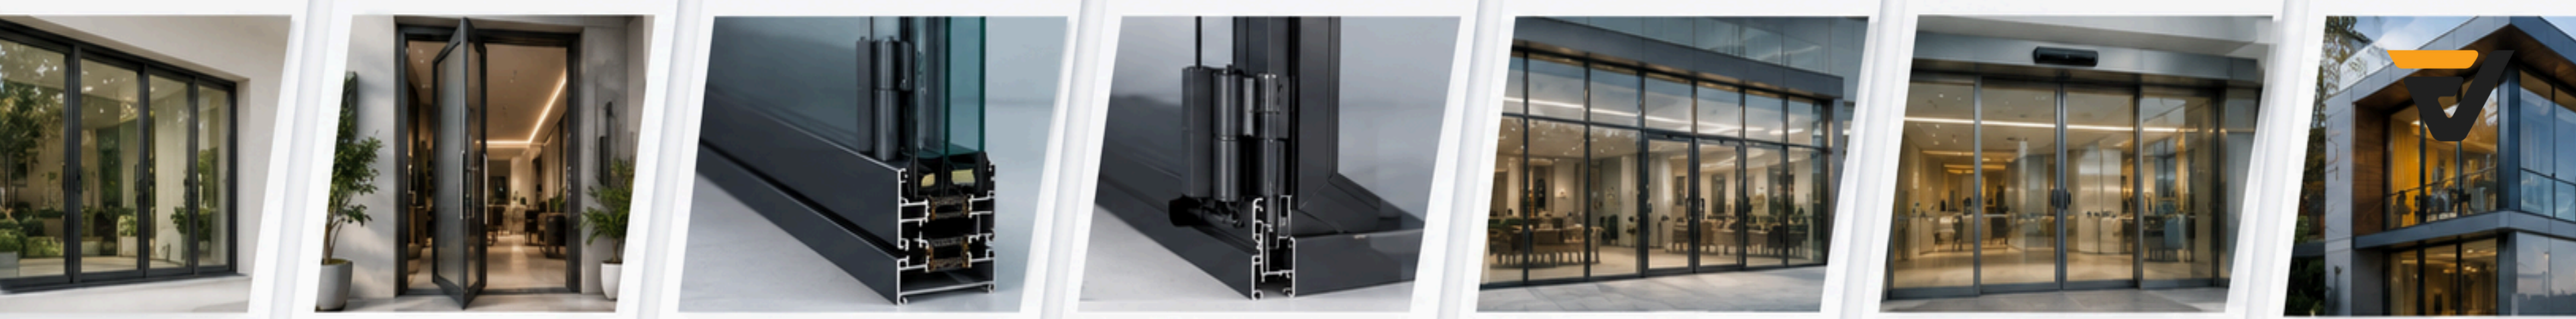

## ACP & Aluminium Composite Cladding

At Emerik Valley, we provide high-quality ACP (Aluminium Composite Panel) and aluminium cladding solutions designed to deliver a modern appearance, long-term durability, and superior weather resistance for commercial, residential, hospitality, and industrial buildings across the UAE.

Our ACP cladding systems are engineered to enhance both the aesthetics and performance of building exteriors. With lightweight yet strong aluminium composite panels, we create clean architectural finishes that offer excellent insulation, corrosion resistance, and low maintenance requirements. From modern façade elevations to decorative exterior applications, our solutions are customized to match each project's structural and design requirements.

**We manage the complete process — from fabrication and material preparation to installation and finishing — with strict attention to precision, alignment, and quality control. Every panel is manufactured and installed according to approved specifications to ensure seamless integration, weather-tight performance, and long-lasting structural reliability.**

**At Emerik Valley, precision in fabrication and accuracy in installation are at the core of every façade system we deliver, helping clients achieve durable, elegant, and professionally finished exterior structures.**

## **Core Services**

### **Doors & Windows**

At Emerik Valley, we provide premium aluminium doors and window systems designed to combine modern aesthetics, durability, security, and energy efficiency. Our solutions are suitable for residential towers, villas, commercial buildings, hospitality projects, and industrial developments across the UAE.

#### **Sliding Windows**

Our aluminium sliding window systems are designed for smooth functionality, space efficiency, and modern appearance. These windows are widely used in apartments, residential towers, offices, and commercial properties due to their clean design and easy operation.

We install high-performance sliding systems featuring:

**Smooth-gliding track systems | Multi-point locking mechanisms | Weather-resistant sealing | Precision drainage systems | Durable aluminium profiles**

These systems provide excellent ventilation, natural lighting, and reliable long-term performance while maintaining a modern architectural finish.

## Hinged Doors — Thermal Break

Emerik Valley offers advanced thermal break hinged door systems designed to improve insulation and energy efficiency in climate-controlled environments. These doors use polyamide thermal barrier technology within the aluminium profile to significantly reduce heat transfer and improve indoor comfort.

Our thermal break door systems are ideal for:

- Hotels
- Hospitals
- Luxury residences
- Commercial buildings
- Climate-controlled facilities

With strong structural performance, smooth operation, and elegant finishing, these systems deliver both functionality and modern design while meeting high-quality installation standards.

## Hinged Doors — Non-Thermal

At Emerik Valley, we provide high-quality non-thermal aluminium hinged door systems designed for interior applications and sheltered exterior environments. These doors are widely used in residential buildings, offices, commercial spaces, utility areas, and institutional projects where durability, smooth operation, and cost efficiency are essential.

Our non-thermal hinged doors are fabricated using premium aluminium profiles and quality hardware to ensure reliable daily performance and long-term structural stability. Designed with precision engineering and clean architectural aesthetics, these systems offer a modern appearance while maintaining excellent functionality and ease of operation.

Key features of our hinged door systems include:

- Smooth and durable operation
- Strong aluminium frame construction
- Modern and elegant design finishes
- Reliable locking and hardware systems
- Suitable for residential and commercial applications
- Low maintenance and long service life

Every installation is completed according to approved project specifications and quality standards to ensure professional finishing and dependable performance.

## Shopfront Systems

At Emerik Valley, we design and install premium aluminium shopfront systems that combine modern aesthetics, durability, security, and smooth functionality for commercial environments across the UAE. Our shopfront solutions are ideal for retail outlets, malls, offices, showrooms, restaurants, and commercial spaces where visual appeal and structural performance are equally important.

We provide frameless and framed glass shopfront systems with precision-engineered aluminium profiles, high-quality glass, and robust locking mechanisms to ensure long-lasting reliability and a clean architectural appearance. Every installation is customized according to the project layout, branding requirements, and operational needs of the client.

Our shopfront systems are built to deliver:

- Modern and elegant glass finishes
- Smooth opening and closing operation
- Strong security and durability
- Weather resistance and structural stability
- Professional installation with precision alignment

With a focus on quality craftsmanship and premium finishing, Emerik Valley delivers shopfront solutions that create a professional, welcoming, and visually impressive commercial environment.

## Automatic Doors

Emerik Valley provides advanced automatic door systems designed for convenience, safety, accessibility, and high-traffic commercial use. Our automatic sliding and swing door solutions are widely installed in hotels, hospitals, shopping malls, office buildings, airports, and commercial entrances across the UAE.

We offer complete installation solutions including:

- Automatic sliding doors
- Automatic swing doors
- Revolving door systems
- Motion sensors and activation systems
- Operators, frames, and hardware integration

Our automatic door systems are engineered for smooth and quiet operation, energy efficiency, and long-term performance. Every system is installed with precision to ensure reliable functionality, modern appearance, and maximum user safety in busy commercial environments.

## Custom Configurations

Emerik Valley offers fully customized aluminium door and glazing solutions tailored to the specific design, operational, and architectural requirements of each project. We provide flexible configuration options for commercial buildings, offices, retail spaces, hospitality projects, and modern residential developments.

Our custom solutions include:

- Single and double-leaf door systems
- Heavy-duty aluminium profiles
- Integrated access control compatibility
- Customized thresholds and hardware
- Frameless and framed configurations
- Bespoke designs based on approved shop drawings

From concept to installation, our experienced team ensures every system is manufactured and installed with precision, delivering a balance of aesthetics, durability, security, and functionality for modern architectural projects across the UAE.

## **Core Services**

### **Glass & Architectural Works**

At Emerik Valley, we deliver premium glass and architectural aluminium solutions designed to enhance modern interior and exterior spaces with elegance, durability, and functionality. Beyond standard façade systems, we specialize in custom architectural glass works for residential, hospitality, commercial, and luxury development projects across the UAE.

#### **Glass Balustrades — U-Channel & F-Channel**

Emerik Valley provides sophisticated glass balustrade systems for balconies, terraces, staircases, mezzanines, and open public areas. Our U-channel and F-channel systems are designed to create a sleek frameless appearance while maintaining maximum strength and safety.

Using toughened and laminated safety glass with precision aluminium support systems, we deliver clean architectural lines, modern transparency, and durable long-term performance. These systems are widely used in luxury residential projects, commercial buildings, hotels, and premium developments where aesthetics and safety are equally important.

## Staircase Glass

Our staircase glass systems are designed to create visually open and elegant interiors while ensuring structural safety and durability. We install premium tempered and laminated glass panels for staircase balustrades and handrail systems with precision-cut detailing, polished edges, and high-quality stainless steel or aluminium fittings.

These installations are commonly used in luxury villas, penthouses, commercial lobbies, office spaces, and public environments where modern architectural openness and premium finishing are essential.

## Pool Glass Fencing

Emerik Valley offers durable and stylish frameless pool glass fencing systems engineered specifically for the UAE climate. Using corrosion-resistant stainless steel or aluminium hardware combined with high-strength toughened safety glass, our pool fencing solutions provide unobstructed views, enhanced safety, and a modern luxury appearance.

Each installation is carefully designed to comply with safety standards while maintaining clean visual aesthetics suitable for villas, resorts, hotels, and high-end residential properties.

## **Shower Partitions & Washroom Works**

---

We provide modern frameless and semi-frameless shower partition systems designed to enhance contemporary bathroom and washroom interiors. Using premium toughened safety glass and precision aluminium hardware, our shower enclosures offer durability, water resistance, and elegant modern styling.

In addition to shower partitions, we also deliver customized washroom glass and mirror solutions including mirror installations, custom-sized glass panels, and aluminium fittings with precise finishing and tight installation tolerances for premium residential and commercial environments.

## Core Services

### **Metal & Specialty Works**

At Emerik Valley, we provide premium metal and specialty architectural solutions designed to complement modern construction and exterior design projects across the UAE. Our expertise extends beyond glass and aluminium systems into customized fabricated metal works that combine durability, functionality, and architectural elegance for residential, commercial, hospitality, and luxury developments.

#### Aluminium Pergolas

Emerik Valley designs and installs modern aluminium pergola systems that create stylish and functional outdoor spaces for villas, hotels, rooftop terraces, restaurants, resorts, and commercial properties. Our pergola structures are engineered for the UAE climate, offering high resistance to heat, corrosion, UV exposure, and harsh weather conditions.

We provide customized fixed-roof, louvered, and retractable pergola systems with elegant architectural finishes that enhance outdoor comfort while maintaining durability and low maintenance performance. Every pergola installation is carefully fabricated and installed to achieve both structural strength and modern visual appeal.

## Stainless Steel Railings

Our stainless steel railing systems are designed to deliver safety, strength, and sophisticated architectural aesthetics for staircases, balconies, corridors, walkways, terraces, and commercial spaces. Using premium-grade stainless steel with precision fabrication, we create railing systems that combine modern appearance with long-lasting durability.

Emerik Valley provides straight, curved, and customized railing configurations tailored to approved project drawings and architectural requirements. Every installation is completed with high-quality fittings, polished finishing, and accurate alignment to ensure structural reliability and professional presentation.

## CNC Decorative Panels

Emerik Valley offers custom CNC-cut decorative metal and aluminium panel solutions for modern architectural applications and feature installations. These decorative systems are widely used for façades, wall features, partitions, privacy screens, ceilings, pergolas, and exterior architectural accents.

Using advanced CNC cutting technology, we produce highly detailed patterns and customized designs with precise dimensional accuracy and premium finishing quality. Our decorative panel systems are designed to create visually striking architectural elements while maintaining durability, weather resistance, and structural integrity for both interior and exterior environments.

# Why Chosse Us

## Skilled Installation Teams

At Emerik Valley, our experienced aluminium and glass installation teams deliver precise workmanship, professional execution, and reliable project support while maintaining high standards of quality and safety on every site.

## UAE Project Experience

We have strong experience working across residential, commercial, hospitality, and high-rise projects throughout the UAE, understanding the demands of fast-track construction environments and premium finishing standards.

## Quality-Controlled Execution

Every project is executed under strict quality control processes, including proper inspections, alignment checks, approved shop drawings, and professional installation practices to ensure long-lasting performance.

## Fast Mobilization

Our organized workforce and project-ready teams allow us to quickly mobilize manpower, materials, and installation support to maintain smooth project progress and avoid unnecessary delays.

## Site Safety Compliance

Safety remains a priority in every operation. We strictly follow UAE safety standards with trained staff, PPE compliance, risk management procedures, and responsible site practices.

## Competitive Pricing

We provide cost-effective solutions without compromising on material quality, workmanship, durability, or overall project execution standards.

## Dedicated Supervision

Every project is supported by dedicated supervisors who manage daily coordination, installation quality, workforce handling, and timely project execution with complete accountability.

# Project Capability

At Emerik Valley, we are fully equipped to manage a wide range of construction, façade, aluminium, glass, and architectural projects across the UAE. Our experienced teams are structured to handle multi-floor, multi-zone, and fast-track project execution with organized planning, skilled supervision, and efficient material coordination to ensure smooth installation progress and timely delivery.

## Façade & High-Rise Capability

Emerik Valley has extensive experience handling façade and high-rise installation projects involving curtain wall systems, large-format glass panels, aluminium structures, and architectural glazing systems. Our team follows strict project coordination, material management, and safety procedures to maintain efficiency on active construction sites.

We work closely with contractors, consultants, and project management teams to ensure proper execution, site coordination, inspection compliance, and smooth installation processes throughout every stage of the project.

## Project Types

We successfully deliver solutions for:

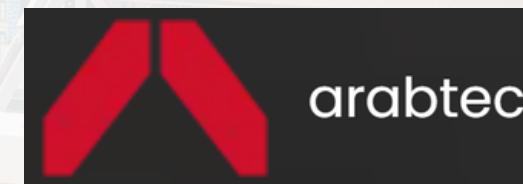

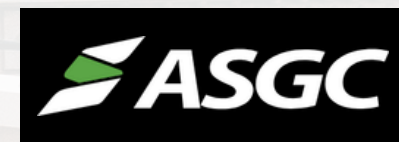

**High-rise residential towers | Commercial office buildings | Luxury hotels and hospitality projects | Villas and townhouse communities | Retail shopfronts and mall fit-outs | Industrial and warehouse facilities | Interior fit-out and renovation works**
